- Vasodilatation

Laser Therapy

Laser Therapy is a FDA approved, non invasive drug free therapy that does more than just treat the symptoms of chronic pain. It actually promotes healing, delivers a soothing, healing light energy to the root of the pain and its ability to penetrate through bony, soft tissues and muscle to treat tissues at the cellular level.

Wide range of indications

High power can treat any part of the body

- Chronic joint degenerations
- Muscle and tendon injuries
- Myofascial pain
- Skin diseases
